

Rally Car “Customizable”

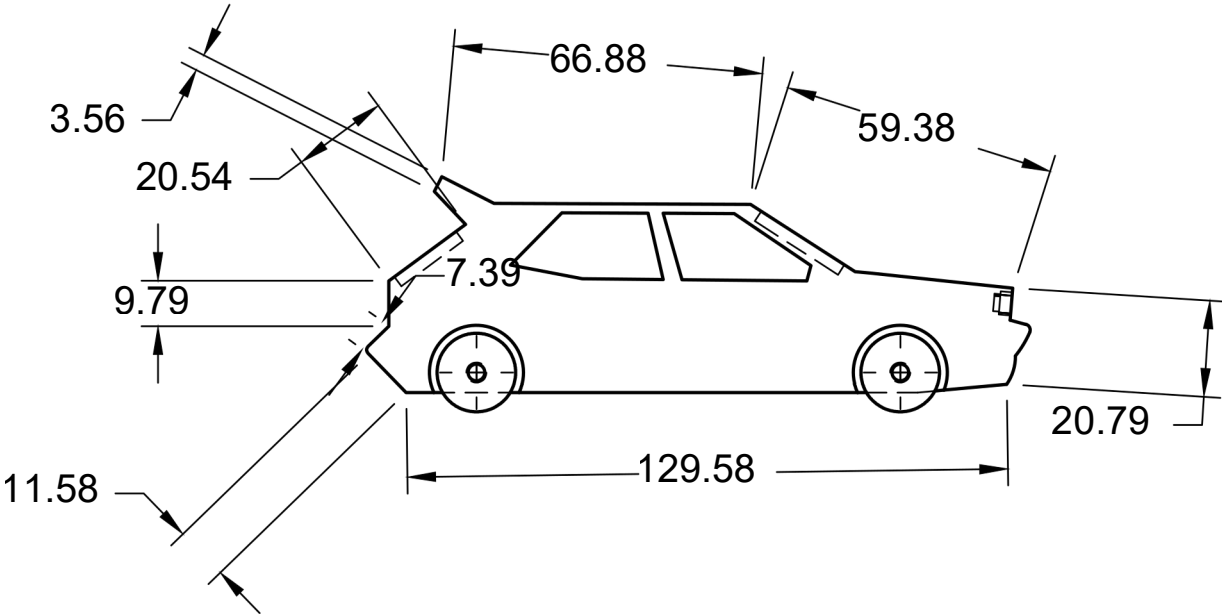

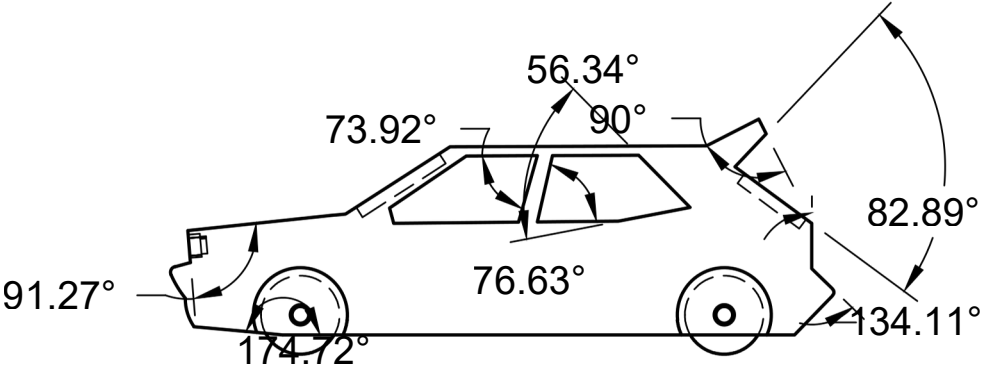

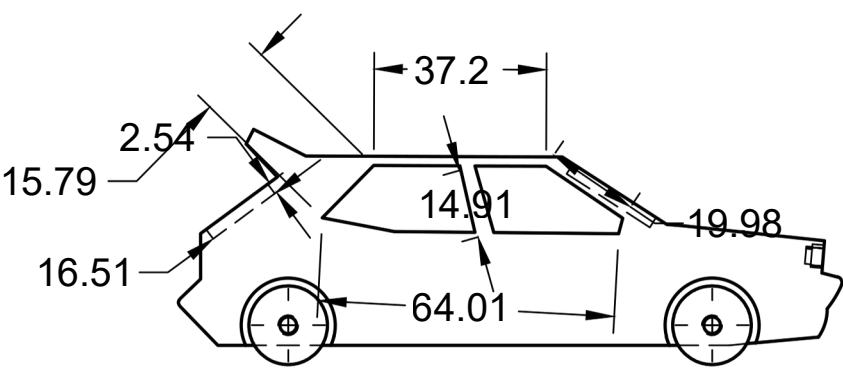

A Brief Summary:

This model car features movable wheels and a fully customizable blank body. Inspired by the classic and legendary Lancia Delta Integrale; the boxy shape of the car matches this simplistic design.

This lite model kit is aimed for ages 8 and up, designed for those who enjoy building models together. Encouraging hands on learning and creativity. It can also be custom painted to the users desire (custom liveries and realistic details).
